

Indonesia Journey in Low Emission Development: Challenges and Possible Avenue for the Future

Farhan Helmy currently is a Manager of Indonesia Climate Change Center (ICCC), managing ICCC portfolios and representing ICCC to various international community of practice on climate change scene. Previously he is a Secretary of Mitigation Working Group at (National Council on Climate Change –Indonesia (DNPI)). He was also a leading negotiator of Indonesian delegation to the United Nations Framework Convention on Climate Change (UNFCCC) on the mitigation issues. Before his current post, he was appointed as Oversight Committee member on substantive issues of ICCC Clusters. He is a scientifically-trained independent professional of natural resource and environmental policy analysis, with special interests and experiences in forestry governance, land use and spatial dynamics, low carbon growth strategy, disaster risk reduction, risk assessment and environmental vulnerability mapping, and the use of open-source based tools, such as Geographic Information Systems (GIS), remote sensing, and Decision Support Systems (DSS).

His specialities are conceiving, designing and assessing environmental information systems and decision support systems, and their implementation at national, provincial and district levels. He is also network focal point of Indonesia Carbon Update Network (ICU-net, www.indonesiacarbonupdate.net), Asia Forum on Carbon Update (AFCU-net, www.afcunetwork.net) as well as National focal point of South East Asia Climate Change Focal Point (SEAN-CC), Chairperson of Green Voice Indonesia, www.greenvoiceindonesia.net and Editor in Chief of Green Investment, Innovation and Productivity Magazine.
